

Please do not implement any proposal that would lessen Indiana's telephone privacy law protections. I was receiving up to 8 calls a day (sometimes more) at all hours of the day and evening. These have all stopped since I signed up for the Indiana Telephone Privacy law to be applied to my phone. Now the only calls I get I know I can answer because it will be relative or friends or business that I have asked to conduct. No one else needs to call me and bother me and my family. This is very important to me, because before I could not answer my phone, and had to worry if a family member had an emergency. Please don't put me in this situation again - I despised all the solicitors bothering me at home. This is not capitalism, this is exploitation and very offensive. I cannot say how much this disturbs our family. Don't change our protection to allow any one else to start calling us again. Please, Please, Please, Please!
